Introduction:

Plassey College is committed to serve the society through its teaching, innovation, lifelong learning, cultural enrichment and outreach programs. The College came into existence in the year 2010 and is affiliated to University of Kalyani. The college is going for the 1st Cycle of NAAC Accreditation. The College at present imparts education in as many as 5 Honours courses and 8 general courses. The college realizes sustainable and holistic waste management practices in reducing its carbon footprint and providing a safe and healthy work environment for all the stakeholders of the college. The college realizes it's duty in order to ensure that all the campus wastes are disposed of responsibly by using proper waste segregation mechanism at the source and if possible, converting it into environment friendly product. The purpose of the policy document is to facilitate a prompt implementation of several rules like: Solid Waste Management Rule-2016, e-Waste Management and Handling Rule-2016, Hazardous Waste Management Rule-2016 for proper college environment management aspects which include waste minimization, guided and environmental friendly management.

The Policy Statement:

The College has adopted principles of the 'best practicable environmental option' in the delivery of its waste management services. The approach is a 'waste hierarchical approach', to reduce, reuse, recycle and recover waste products in preference to the disposal of waste. The college recognizes the importance of meeting these requirements and to manage its waste responsibly, reduce the volume of waste sent to landfill and maximize reuse and recycling wherever possible.

Policy Objectives:

The objectives of this policy are:

- To ensure that waste management is performed in accordance with all legal requirements, and to plan for future legislative changes and to mitigate their effects.
- To minimize waste generation at source and facilitate repair, reuse and recycling over the disposal of wastes in a cost effective fashion.
- To provide clearly defined roles and responsibilities to identify and co-ordinate each activity of the waste management.
- To promote environmental awareness in order to increase and encourage waste minimization, reuse and recycling.
- To expand the recycling opportunities in the college campus and ensure the waste to wealth mission.
- To ensure the safe handling and storage of wastes in the college campus.
- To provide appropriate training for teachers, staff and students on waste management issues.
- To promote holistic approach of waste management in the campus.

Organization and Management

The responsibilities and organizational arrangements for this Waste Management Policy with a variety of personnel within the College.

Advisory Board

Principal

President- Governing Body

Coordinator- IQAC

Convener- Campus Beautification Committee

Faculties- Department of Environmental Studies

Function of Advisory Board

- i) Coordinating the provision for the service providers of the waste management.
- ii) Ensuring that all the internal management options are maintained in continuous functional mode and comply with the college's Waste Management Policy.

Waste Policy and Operation

The College will:

- Meet or exceed all waste related legislation and requirements;
- Implement waste strategies based on the waste hierarchy
- Reduce waste production – Before one buys, consider whether the item is being offered for reuse by another. If not, then make sure that waste from the item purchased can be effectively reused or recycled. Where possible make attempts to repair items before going on to purchase new. Get suppliers to take back unwanted packaging when delivery is made as part of order form by procurement;
- Reuse items – Explore opportunities to reuse items before disposing as waste. Examples are furniture, books and IT equipment;
- Recycle as much as possible – Most materials can now be recycled. Purchase products that can be recycled and where possible are made from recycled materials.
- Recover useful materials from waste, Energy from Waste – for example metal can be separated and taken to scrap yards and food waste can be collected and turned into compost;
- Disposal – Disposal to landfill is the last resort for items that cannot be dealt with by any of the above options;
- Ensure that all staff as producers of waste become responsible for managing their own domestic waste stream, sorting out their recycling and reducing waste to landfill;

Responsibilities

Responsibility for waste production and consequently waste management must be shared by every member of Plassey College staff and students Below is the list of keystakeholders and their role in waste management:

All Staff

All staffs are required to support the College's waste policies by: minimizing waste production, reusing items and recycling as much waste as possible.

All Students

The students of Plassey College are required to support and abide by the college's waste policies – reducing waste, reusing and recycling as much as possible. Students are also advised to be clean and considerate when in college premises.

Cleaning Staff

Cleaning staff of the college are responsible for emptying the designated waste receptacles and for the appropriate storage of the different waste streams prior to collection by the appropriate waste collector. Also, they are required to assist with improvements to waste management operations and waste audit exercises.

Waste Contractors

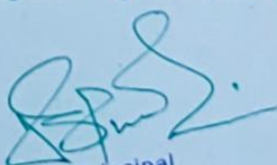

The waste services contractor will assist in the continual improvement to the College's waste management operations and performance as much as possible and fulfill the performance related aspects of their contract.

Communication and outreach Campaigns

Effective communication and outreach campaigns will greatly contribute to the improvement of the waste management system and provide a platform for promoting other objectives within the environmental policy.

Auditing and Continuous Improvements

Spot check audits will be conducted twice a year across the College's estate to identify recycling hotspots with a view to introduce targeted interventions. In addition, areas of improvements and non-conformities can be identified during the Sustainability Management System (EMS) auditing process.
